

The Return of the God of War [The Protector] Chapter 4038 -

The three continued to move forward, and the frequency of thunderbolts falling became higher and higher.

Gongsun Yueying and Murong Qingxue's panic at the beginning gradually turned into trembling, and finally turned into numbness.

Of course, the biggest emotion of the two women was shock, shocked by the terror of Levi Garrison's strength.

Because they found that in the process of approaching the core area of the Buried Dragon Valley, Levi Garrison had no evasion from the bombardment of the thunder.

Instead, he took the initiative to accept the baptism of Tianlei, and even released an energy vortex, which directly attracted the Tianlei that was attacking the two women.

Levi Garrison seemed to be enjoying the process of being struck by lightning.

"You mentioned the terrifying creature recorded in the ancient books earlier, and I began to think it was a fantasy."

"But now it seems that the thing is very likely to exist, perhaps the descendants of the ancient spirit beasts recorded in the ancient scriptures of mountains and seas."

Murong Qingxue said through voice transmission.

The corner of Gongsun Yueying's mouth twitched, and she felt the same way in her heart. After all, Levi Garrison could bathe in the thunder without being hurt by himself.

How did the two women know that Levi Garrison took the initiative to attract Tianlei because he found that the effect of using Tianlei to quench his body was even better than that of dragon vein quenching.

It is also because of this factor that Levi Garrison insisted on continuing to the core area of the Buried Dragon Valley.

After all, the Thunder Tribulation in this marginal area has such an effect, so the body quenching effect in the core area is definitely better.

It suits his style so well.

Boom boom boom!

Several more purple thunders struck Levi Garrison one after another. He quickly ran the basic exercises, quenched the power of the thunder, and washed the meridians.

The two women saw dazzling electric flowers erupt around Levi Garrison's body, and the aftermath of the terrifying power of thunder and lightning spread rapidly.

Even though they were so far apart, even though the two women had tried their best to resist, they still felt like their whole bodies were about to split.

You must know that this is just the energy aftermath of the purple sky thunder, and it has brought such a big impact on them.

It's hard to imagine what kind of violent energy Levi Garrison, who was directly hit in a row, would endure?

"It's too powerful!"

"Why did I want to kill him before?"

Gongsun Yueying couldn't help but regret, what kind of terrifying existence did she provoke?

Murong Qingxue was equally astonished. Facing such a terrifying bombardment of the heavenly thunder, the experts from the Xingyue Divine Sect would probably be wiped out long ago.

Even the high-level powerhouses of the Sun Moon Divine Fire Hall would probably suffer heavy casualties.

Even if it is a powerhouse at the level of the palace master, I am afraid it is difficult to pass through this area intact.

On the other hand, Levi Garrison didn't even damage the corners of his clothes, and even he was distracted by the energy shield to protect himself?

You must know that maintaining such a large-scale energy shield itself will consume a lot of power, not to mention the restraint and coercion of the sky and the underground?

How terrifying is this kind of cultivation?

"Walk another two or three miles to reach the core area of Buried Dragon Valley."

Levi Garrison said excitedly.

After this period of time, he felt that his cultivation realm had improved again.

In particular, the toughness of the body and meridians has also improved a lot again.

You must know that since using more than ten dragon veins to quench the body, Levi Garrison's increase in physical strength has been very limited.

Take the dragon vein that he snatched not long ago, Levi Garrison doesn't have a strong sense of improvement, and it can even be described as better than nothing.

However, the Sky Thunder Tempering Body in this area can actually make him significantly improve, so he can't miss such a good opportunity no matter what.

The Tianlei on the edge of the Buried Dragon Valley is still so effective, it is conceivable that the core area will definitely have a better effect on improving one's own strength.

"It is very possible to reach a whole new realm by quenching the body through the sky thunder in the core area!"

The more Levi Garrison thought about it, the more excited he became.

At that time, don't say anything about the powerhouses of the Sun Moon Divine Fire Palace. Even if he encounters more powerful sectarian forces, Levi Garrison is not afraid at all.

The Return of the God of War [The Protector] Chapter 4039 -

Seeing Tianlei's movement in the distance even more deafening, Gongsun Yueying and Murong Qingxue shivered involuntarily.

Although Levi Garrison had been there to protect them during this period of time, the aftermath of the thunder still made them exhausted.

Occasionally, the whole body will be paralyzed by electricity. Although it is not a substantial injury, it still makes the two girls feel lingering fears.

What's more, in the core area, whether it is the number of sky mines or lethality, I am afraid that there will be a qualitative improvement.

At that time, it is difficult to say whether Levi Garrison can still devote his energy to protecting himself.

Once they lost Levi Garrison's energy shield to defend themselves, Gongsun Yueying and Murong Qingxue felt that they would be wiped out within a quarter of an hour.

Of course, even if you think in a good direction, there is an energy shield blessing.

Such a powerful and dense aftermath of the thunder, I am afraid it will also cause fatal damage to them.

It's a dead end anyway!

Boom!

The deafening thunder sounded again, and the two girls were shocked.

The powerful energy coercion struck again, and the outer layer of the energy shield had been backlogged and shattered.

It was as if the energy shield could be crushed to pieces at any moment.

The surrounding dark clouds are lower, making people feel like they can't breathe.

The two women's breathing suddenly became extraordinarily rapid, and they could clearly see that their bodies were shaking violently.

Finally, after half an hour, Levi Garrison and others came to the edge of the core area.

In front of you is a cold pool that is several miles long, but the water on the uppermost layer is jet-black, and a faint white cold air rises faintly.

Clap clap!

Countless thunders of different thicknesses and colors were continuously smashing into the cold pool, but the water surface was surprisingly calm, with sparks shining and beating constantly.

There was a smell of something burning in the void, making people feel dizzy after taking a breath.

The black cloud above the cold pool is extremely low, as if it is connected to the water surface of the cold pool, but in fact there is a certain distance.

Buzz!

Countless thunderstorms continued to smash the cold pool, and the powerful energy aftermath spread out, constantly impacting the energy shield directly in front of Levi Garrison.

There was a deafening sound similar to the violent collision of metals, and even at the realm of Levi Garrison's cultivation at the moment, there was a solemn expression on his face at this moment.

"What a terrifying energy!"

Levi Garrison couldn't help but sighed.

In such a short time, the power of the thunder that poured down from the sky is comparable to a large dragon vein.

The most important thing is that Tianlei seems to contain a deeper level of control, and it seems to be catering to some legendary Dao rules.

And every time the thunder strikes, it is trying to control the energy balance of the entire Dragon Buried Valley.

It is precisely because of this that the water surface of the cold pool can still remain so calm under such a dense and violent thunderstorm.

I'm afraid it's also because the energy in this area is balanced to some extent.

It's just the moment when the thunderbolt hits the water, and the power of other thunderbolts will not be offset.

The entire Dragon Burial Valley seems to be a field of violent thunder and lightning.

"You keep a farther distance from me, and I will try to isolate Leiyu from you as much as possible."

Levi Garrison ordered.

The two women nodded instinctively, and could feel that they were extremely nervous, and the cold sweat on their foreheads couldn't stop dripping down.

However, the moment when Levi Garrison stepped forward and stepped into the first step in the real core area suddenly mutated.

The three thunderbolts were like laser cannons that locked the target, and they blasted towards the location of Levi Garrison and others in an instant.

"Be careful!"

Gongsun Yueying and Murong Qingxue couldn't help but scream in shock.

Even through the thick energy shield, they still clearly felt the destructive energy coercion of these few thunderbolts.

The three colors of red, orange and yellow thunder are coming in the blink of an eye, as if to blast Levi Garrison and others into powder.

The Return of the God of War [The Protector] Chapter 4040 -

Levi Garrison's eyes were slightly condensed, and the three-color thunderbolt bombardment further confirmed his previous guess.

The entire Dragon Burial Valley has indeed reached a certain energy balance.

The three of them suddenly entered the core area, and the three energy bodies suddenly intervened, thus breaking this energy balance.

Then Tianlei naturally wants to destroy this 'abrupt energy body' and restore it to its original state.

"This kind of thunder really contains some kind of energy law between heaven and earth."

Thinking of this, Levi Garrison didn't dare to neglect at all.

Because he can feel that the energy contained in these three thunders is even stronger than the previous purple thunder.

"I want to see how powerful you are?"

Levi Garrison directly ran the basic exercises and took the initiative to lead the three thunders to himself.

Boom!

Levi Garrison chose hard resistance.

The energy shield in front of him was blasted to ashes in an instant, and the entire body was also wrapped in three thunderbolts.

Clap clap!

The electric light shone, and Levi Garrison shook slightly.

But he didn't suffer any substantial damage. At this moment, his body strength was quenched again, which in turn increased a little.

However, the two women hiding in the distance did not have such good luck, even if they were protected by an energy shield and only needed to withstand the energy aftermath of the power of the thunder.

But the impact of this reaction still caused the two to receive some minor injuries.

Even the weaker Murong Qingxue had a trace of blood flowing from the corner of his mouth.

In this short period of time, Levi Garrison completed the consumption of the energy of the three thunders.

Swish!

Levi Garrison stepped back suddenly, exiting the real core area category.

In this way, there is no internal Tianlei to continue to track.

"That's exactly what happened."

Levi Garrison said quietly.

The reason Levi Garrison entered rashly just now was to test his speculation, and also to test the strength of Tianlei in the core area.

Although he had absolute confidence in his physical strength, Levi Garrison also took into account the safest possible operation.

Now Levi Garrison knows a lot about many aspects, especially the strength of Tianlei and the attack rules.

Gongsun Yueying and Murong Qingxue's faces were as pale as paper. Even though they were not seriously injured just now, they were deeply afraid of the core area.

You must know that it was just the aftermath of Tianlei, and they were still under the protection of the energy shield.

Without this energy shield, they might have perished just now.

"Master, let's not go in!"

Gongsun Yueying said in a dry voice.

Gongsun Yueying was almost certain that once he entered the core area of the Dragon Burial Valley, there would be no room for escape.

The entire cold lake is like a huge sea of thunder, and the criss-crossing various kinds of thunder will bombard the uninvited guests rashly indiscriminately.

However, if you want to fight against such dense and intense Tianlei, you need either top-level physical training, or you need to have various top-level protective magic weapons.

However, Gongsun Yueying did not possess these two necessary skills.

Otherwise, a person of her cultivation realm would break in, and there would be almost nothing but an instant annihilation.

At this time, Gongsun Yueying finally understood why the two palace masters had changed their talk about the Dragon Burial Valley.

Even with their cultivation base, they can't fight against such a powerful Tianlei for a long time.

To be able to retreat in this sea of thunder, I am afraid that I will burn a high incense.

“According to the attack intensity of the few thunderbolts just now, even the two hall masters couldn't last for three minutes.”

Gongsun Yueying made a judgment in her heart.

However, they couldn't get close to Hantan in such a short time.

As for the real god bones, they also need to go to the shore of the cold pool, or even go deep into the cold pool to find them.

At this moment, a terrifying explosion of thunder suddenly sounded.
