

The Return of the God of War [The Protector] Chapter 4052 -

Murong Qingxue was also very happy when Gongsun Yueying was confirmed.

The death order issued by Levi Garrison was completed, and they could stay away from this extremely dangerous place.

When the two girls were excited, they wanted to get close to the god bone, but just after taking two steps forward, the edge of the originally calm cold pool suddenly surged.

Immediately, a terrifying power of lightning struck, directly hitting the energy shield.

Clap clap!

The surface of the energy shield cracked instantly, and then the outermost shields suddenly shattered.

Not only that, the power of thunder and lightning is extremely penetrating, and a purple electric arc penetrates it, attacking Gongsun Yueying and the others directly.

The two women were caught off guard and hurriedly ran the exercises to defend against it, but they were still directly knocked out, and finally fell heavily to the ground.

puff!

The two women vomited blood, and their breath became extremely sluggish.

Fortunately, the energy shield was quickly replenished, so that they did not continue to suffer heavy losses, otherwise it is unknown whether this life can be saved.

“This force is too strong, we can’t get close at all.” Murong Qingxue said sullenly, wiping the blood from the corners of his mouth.

Gongsun Yueying sighed and said helplessly: “The divine bone must have been integrated with the energy of Hantan, especially it has a spiritual charm.”

“As long as we get close, it will be regarded as an enemy attack, and the power of thunder and lightning in the cold pool will attack.”

There is nothing more frustrating than watching a peerless treasure in front of you but can’t get it.

The power of thunder and lightning in the cold pool is enough to destroy Murong Qingxue and the others, even if there is an energy shield, it will not help.

As Gongsun Yueying said, the divine bone has been integrated with the energy of Hantan, and if you don't grab the divine bone, nothing will happen.

However, once subconsciously approached and touched, he would be attacked by the power of lightning from Hantan.

The two looked at each other, and both saw a hint of despair in each other's eyes.

"According to the strength of this kind of thunder and lightning, no one can get close to Hantan, let alone go deep into it to find other treasures."

"Even if the temple master of the Sun Moon Divine Fire Temple falls into it, I am afraid it will end up with a tragic ending."

Murong Qingxue said with a sigh.

Gongsun Yueying did not refute this, even she thought so in her heart.

What's more, many god bones are in the cold pool, and only a part is exposed. If you want to get them, you must enter the cold pool to salvage.

Nowadays, it is impossible to even get close to the edge of Hantan, and entering Hantan is basically a dream.

"There is also an extremely terrifying energy attached to the bones of the gods. It must be that years of lightning strikes have integrated the power of lightning into it."

Gongsun Yueying's face was full of helplessness, even if they passed the Hantan level, just touching the bones of the gods could turn them into coke.

"Master, we have no way to get close to the bones!"

"Yes, Sect Master, we can't break through the power of lightning in Hantan."

The two women came to Levi Garrison to report not far away.

Clap clap!

Before Levi Garrison could respond, the lightning and thunder in the air suddenly stopped, and even the 'electric tornado' that had just soared into the sky suddenly fell into the cold pool.

It was as if they were all at peace together.

However, Levi Garrison's face was not at all relaxed, but became more solemn.

Murong Qingxue and the others also suddenly looked towards the giant electric ball above the center of Hantan, the two pretty faces were instantly pale as paper.

Her delicate body trembled uncontrollably, and her breathing was extremely rapid, as if she had seen a terrifying devil.

But seeing that the giant electric ball has expanded to the size of a football field, the dazzling electric light makes people unable to look directly.

Especially the terrifying coercion of the power of thunder and lightning makes people feel hopeless.

"The thunder of this day is enough to destroy the sky and destroy the earth!"

Murong Qingxue looked at Levi Garrison with a worried face.

The Return of the God of War [The Protector] Chapter 4053 -

Gongsun Yueying was also trembling constantly, looking at Levi Garrison with burning eyes.

After all, whether the man in front of him can survive this disaster is directly related to his own life and death.

But to be honest, Gongsun Yueying has a serious lack of confidence in Levi Garrison.

Although Levi Garrison had shown super strong combat power before, the giant electric ball almost gathered the power of thunder and lightning in the entire Dragon Burial Valley.

This energy is enough to destroy the world.

Not to mention flesh and blood, even the armor forged with the top hard materials of Kunlun Ruins will be bombarded to ashes in an instant.

"You two just mark the location of the god bones and other treasures. As for how to take them away, you don't have to worry about it, just go!"

Levi Garrison commanded in a deep voice.

It can be felt that Levi Garrison's momentum has also restrained a lot at this moment, and even a little dignified between his brows.

The coercion of energy released by the giant electric ball had already made him feel a hint of danger, and Levi Garrison knew that he had to be careful.

The two women did not dare to be slighted, and hurriedly followed Levi Garrison's instructions, and continued to search for divine bones and the same level of heaven and earth treasures.

Of course, Murong Qingxue and the others did not dare to enter the cold pool, so they could only search carefully along the shore.

It may be because the 'electric tornado' fell into the cold pool again, the power of thunder and lightning in the entire cold pool was a little stronger.

In particular, the cold air was even stronger than before. Even though the two women kept exercising to keep out the cold, they still felt that their limbs tended to freeze.

Moreover, the sense of restraint from the leylines on the shore is more obvious than before, knowing that the energy shield has isolated the connection between their feet and the surface.

However, even so, Murong Qingxue and the others still felt that it was difficult to walk, and they were exhausted and out of breath after only walking a few meters.

The cold air rose, accompanied by electric flowers, as if the god of thunder in the fairyland came into the world, which made people feel awe.

However, there were eyes staring at all of this in the dark, and the two women didn't notice it.

Levi Garrison, who was preparing for the Thunder Tribulation, turned around suddenly, and seemed to glance in a certain direction intentionally or unintentionally.

At that moment just now, Levi Garrison always felt that someone was watching him secretly.

But when I turned back to observe just now, the feeling of being peeped disappeared again.

Even though Levi Garrison immediately released some of his power to investigate, he didn't get any feedback.

"Tianlei attack is imminent, as for other things, we will talk about it in the past."

Levi Garrison made up his mind and concentrated again to prepare for the Tempering of the Thunder.

This kind of thought has not completely dissipated, and suddenly an extremely terrifying force came from under his feet.

Clap clap!

Levi Garrison was caught off guard, and his feet fell directly into the ground.

Immediately afterwards, the power of the ley lines came again, but this time it was centered on Levi Garrison's legs, tearing away in all directions.

It was as if he wanted to split Levi Garrison's five horses into pieces.

"It seems that this is the prelude to the Tianlei attack."

Levi Garrison ran the basic exercises, his feet suddenly exerted force, and the terrifying tearing feeling was instantly offset.

Boom!

With Levi Garrison's feet as the center, the violent power spread out, and the sense of restraint was instantly broken, and Levi Garrison returned to a state as light as a swallow again.

At almost the same time, the giant electric ball suddenly moved, covering directly above Levi Garrison's head.

Clap!

A terrifying power of thunder poured down, directly blocking Levi Garrison's possible avoidance position, giving him no chance to escape at all.

It was like the Milky Way pouring down, and it was near in an instant.

"finally coming?"

Levi Garrison's eyes flashed with a strong fighting intent, and he did not want to avoid the bombardment of the sky.

The fiery and burning sensation was combined with the incomparably terrifying energy pressure. Levi Garrison directly ran the basic exercises and swept away against the pouring thunder.

The Return of the God of War [The Protector] Chapter 4054 -

Levi Garrison seemed to be in a white world, surrounded by terrifying electric sparks that were hot and violent.

The entire area where the thunderstorm poured down was severely distorted.

“What a powerful lightning force!”

Levi Garrison was a little surprised, because at the moment when the thunder fell, he clearly felt a numbness.

Although this numbness only lasted for a moment, it never appeared under the previous ordinary thunder attack.

This is enough to show that the power of the sky thunder carried by the giant electric ball is more pure than the previous sky thunder power, no wonder it has gathered for such a long time.

Presumably during this period of time, it quenched and purified the power of Tianlei that it gathered to make it more lethal.

Clap clap!

The electric flower jumped quickly on the surface of Levi Garrison’s body, making a harsh electric sound.

At the same time, Levi Garrison, who had already left the ground, suddenly felt an incomparably powerful drag force coming from the ground.

“Is this a two-pronged plan?”

Although Levi Garrison had already exerted his strength to resist, his body still moved down a certain distance, and the sense of drag became stronger as he approached the ground.

At the same time, the second wave of thunder power of the giant electric ball poured down again, like a giant thunder and lightning hammer, trying to smash Levi Garrison into the ground.

Levi Garrison was astonished, he didn’t think that the Earth Vessel and Tianlei in the Buried Dragon Valley actually echoed each other to such an extent, as if they all possessed spirituality.

For creatures that disrupt the energy balance of this area, this devastating blow will be launched to find a new energy balance point.

At this moment, Levi Garrison is undoubtedly the energy balance destroyer.

But then again, after Levi Garrison withstood the attack of the first wave of thunder, his body strength and strength speed increased.

The effect is far greater than that of large-scale dragon veins, which surprised Levi Garrison.

Resisting thunder calamity is certainly dangerous, but the benefits are also extraordinary.

“I want to see how strong Tianlei is today, keep coming!”

Levi Garrison cheered up and rushed towards the power of the thunder again.

the other side.

Gongsun Yueying and the others were struggling to find it, but the restraint of the power under their feet was too terrifying. Every time the two women raised their legs, they lost their strength.

In the end, it was difficult to move at all, and it was as if an ancient beast was hidden under his feet, and it was about to break out of the ground at this moment.

The terrifying energy coercion had squeezed and deformed the energy shield, and finally broke several layers, which made the two women panic.

Because at this moment, Levi Garrison is completely devoted to defending against the thunder attack, and he has no time to repair the energy shield for them.

“This force is so great that I feel like my body can’t take it anymore.”

Murong Qingxue said in a trembling voice.

Gongsun Yueying was nowhere near as strong. The restraining force seemed to be cutting her to pieces. Although she tried her best to defend her, it still had little effect.

Gaba!

With the sound of a crisp bone, Murong Qingxue screamed out in agony. Due to the strength of the tearing force, she suffered a slight fracture directly.

Just when the two women were about to be unable to bear it, the sense of tearing disappeared instantly, as if it had never appeared before.

Swish swish!

The two women could clearly feel the power of the ley lines rushing towards Levi Garrison's direction at a high speed.

It was as if something over there was extracting the power of the ley lines.

"so close!"

Murong Qingxue rubbed her right leg, and the piercing pain came, she hurriedly took a pill, and she recovered a little.

"It's not advisable to stay here for a long time, let's go to a farther place." Gongsun Yueying hurriedly reminded.

Murong Qingxue nodded in agreement, she really didn't dare to stay any longer, she still had lingering fears about the terrifying tearing force just now.

The Return of the God of War [The Protector] Chapter 4055 -

The two women flew away quickly, and they were hundreds of feet away from Levi Garrison's direction, and the pressure of the earth's pulse was relieved a lot.

Of course, the power of the ley lines still exists, but it is far from the strength that can cause damage to their bodies.

"I don't know what happened to the master?"

Gongsun Yueying said worriedly.

Murong Qingxue pondered for a moment, then said, "We don't have a thunderstorm here, at least the Sect Master is safe at the moment."

The two women looked towards the giant thunderball in the distance.

The incandescent light of lightning is like a nine-day Milky Way hanging upside down, and Levi Garrison has already been completely covered without a trace.

Even at such a distance, they could clearly feel the horror of that giant thunderball.

“I hope he can survive this disaster safely.”

The two women prayed in unison in their hearts, as if praying for Levi Garrison, as if comforting themselves.

At this moment, Levi Garrison was completely in the area where the thunder fell, and his body was wrapped by the thunderbolts, and they tried to destroy Levi Garrison's body.

But under the guidance of the basic exercises, Lei Mang is quenching Levi Garrison's body and meridians over and over again.

The giant thunderball seemed to realize that his attack backfired, so he increased the frequency of bombardment against Levi Garrison again.

“It's not a small temper!”

Levi Garrison sneered in his heart, as his body quenching continued to improve his strength, his tolerance for the power of lightning also increased.

Now there is not even the slightest tingling sensation.

“I finally understand that this place is where Lei Hai can gather for a long time and is getting stronger and stronger.”

Levi Garrison suddenly felt a sudden realization.

The source of all this may be the leyline under his feet. If he guessed correctly, there is a very domineering spiritual vein in this area.

And the domineering spiritual vein can forcibly pull Tianlei down to nourish the spiritual vein and make it continue to grow stronger.

Over time, a state of energy balance has been reached in this area.

As the spiritual veins became stronger and stronger, the Tianlei that was pulled down naturally became more and more domineering.

At the beginning of the period, they traded off each other, and finally maintained a balance, but they continued to strengthen under the catalysis of each other.

This is the secret of Lei Hai's inability to disperse over the years and getting stronger and stronger.

“It's very similar to Yan Zangsheng's medicine vein.”

Levi Garrison said quietly.

Although the medicine vein is small in scale, the principle is the same as that of the Buried Dragon Valley.

Spiritual veins like this are the most nourishing for all kinds of heaven and earth treasures, and of course they are also very suitable for forging weapons.

It can be said that it is even better than the small dragon veins, such as the sacred veins and the like are far inferior.

“Then Lao Tzu will use the earth veins as the furnace and the sky thunder as the fire, so that this body and meridians can be hardened properly.”

Levi Garrison knew that he had completely angered Tianlei and this special spiritual vein.

Now they have issued a super revenge.

But as long as he can successfully carry it over, he will reach a new level of cultivation, even stronger than expected.

the other side.

Many sectarian powerhouses who were standing still on the periphery also felt the powerful surge of power.

“What happened to the ground? It seems that something is drawing power, causing a huge shock.”

“And the fluctuation of the power of thunder that day was so terrifying that the trees so far away were destroyed into coke.”

“If it wasn’t for the two palace masters who took action just now, I might have died on the spot.”

Everyone felt the power of the leylines surging towards the core area of the Buried Dragon Valley.

I also felt the power of the thunder, especially the huge light group in the sky at the far end, as if to destroy the entire Dragon Buried Valley.

Because of this, the two palace masters of the Sun Moon Divine Fire Temple immediately ordered all the staff to retreat for dozens of miles.

However, some sectarian powerhouses who were slow to evacuate were all internally injured by the aftermath of the power of the thunder.
